pre-gate vintage
post-gate run
excluded run: equivalent (24-h pooled)
C Two targets, measured
the excluded run, physical vs price
physical: PV potential (MW)
improves 59.9 MW [49.6, 70.6]
price target: the ladder panel
24-h pooled: equivalent within the ±1 tick band (p = 0.024)
error falls 6.8% physical vs 0.14% price
(50x, each in its own units)
732 daily walk-forward folds · 9 JEPX areas · panel C: 696 of those folds, the days the published PV actuals cover
